Annual Admissions Trend & YoY Growth

Monthly Demand Pattern

Monthly Admissions Trend & Repeat Patient Trend

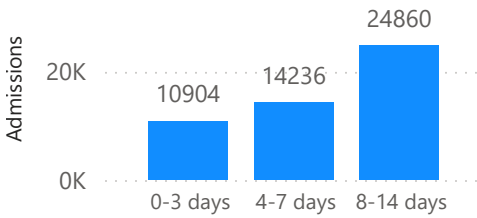

Insights & Takeaways

- 1. **Overall Patient Utilization** - 99.27% of registered patients had at least one admission, averaging 5.00 admissions per patient.
- 2. **Repeat Utilization** - 96.61% of admitted patients were repeat patients, while 3.39% were admitted once.
- 3. **Monthly Demand Pattern** - August had the highest average admissions (860.20), followed by March (857.60) and October (854.80).
- 4. **Weekday Demand** - 71.63% of admissions occurred on weekdays, suggesting higher staffing and resource needs.
- 5. **Annual Demand** - Demand was relatively stable; 2024 was highest (10,242) and 2022 lowest (9,784).

Month-End Patient Census Trend

Admissions vs Discharges Over Time

Net Patient Flow by Month

Insights & Takeaways

- 1. **Capacity Pressure** - Month-end patient census ranged from **172 in Dec 2022 (lowest)** to **238 in Oct 2023 (highest)**, creating different levels of capacity pressure.
- 2. **Patient Flow Stability** - Admissions and discharges remained relatively close from **2020–2024**. **Jan 2020 had the largest gap of 185 patients**.
- 3. **Length of Stay** - Average length of stay was **7.46 days**; the **8–14 day category** was the largest with **24,860 admissions**, which can affect hospital capacity.
- 4. **Monthly Net Flow** - **January** had the biggest positive net flow (+162), while **May** had the lowest (-61).
- 5. **Resource Mix** - **General** rooms had the most admissions with **29,947 (59.89%)**, followed by **Private** with **14,918 (29.84%)** and **ICU** with **5,135 (10.27%)**.

Top 10 Doctors by Admission Workload

Top 10 Doctors by Average Bill / Admission

Doctor	Department	Admissions	Patient
Robert Flores	Emergency	300	
Natalie Brown	Radiology	285	
Rebekah Harris	Oncology	280	
Whitney Carson	Oncology	279	
Vicki Johnson	Urology	278	
Anthony Allen	Oncology	277	
Megan Alexander	Pediatrics	276	
Aaron Jones	Radiology	275	
David Dean	Orthopedics	275	
Elizabeth Preston	Radiology	274	
Sherril Alexander	General Medicine	274	
Total		50000	95

Insights & Takeaways

- Workload** - 250 is the average admissions per doctor. **Robert Flores** has the highest with **300 admissions** and **298 unique patients**, meaning the difference represents repeated admissions.
- ICU & Department** - The doctor with the highest total admissions does not have the highest ICU admissions. Admission workload also varies by department, with **Oncology** being the highest at **6,237**.
- Billing** - **Christopher Carroll** has the highest average bill at **\$42,143.63**, meaning he has a higher average billing value per admission than the hospital average of **\$37,773.51**.
- Table** - From the table, we can see the overall analysis for each doctor and compare the doctors across different measures.

Monthly Demand Pattern

Long-Term Admission Trend (r = 0.155)

Insights & Takeaways

- Seasonal Demand** - August records the highest average monthly admission demand at **860.20**, making it an important reference for staffing and capacity planning.
- Demand Variability** - December has the highest monthly demand variability at **64.14**, making demand less predictable and requiring more flexible planning.
- Long-Term Trend** - The long-term admission trend shows a **weak positive relationship with time (r = 0.155)**, suggesting relatively stable underlying demand.
- 2025 Planning Baseline** - The 2025 trend-based forecast provides a baseline of **843-847 admissions/month**, while actual monthly demand may vary due to seasonal fluctuations.
